Dear _____

How would you feel if you had to keep reading the same old books at your school? I believe that we all have a responsibility to donate books or money to Young Scholars Charter School because barely fifty percent of students do not graduate high school due to not having a high reading level. At my old school we had over 200 books. In our library here we don't even have over 55 books in our library, and ethically, without books we will not get to learn words that we do not know, and raise our reading levels.

The reason why you should donate is so that me and my fellow comrades can get a better education in reading. The first reason why you should donate is that my fellow comrades and I all enjoy books. The second reason you should donate is that I am one of the readers of the month and I am running low on books to read. The last reason you should donate is because without books we will not learn words that we don't know. Those are the reasons of why you should donate and help our reading levels.

At my old school we had over 200 hundred books in the library but here we only have fifty-five books. Every day I get bored of reading the same old books. If we had more books at my school we all can get smarter. We all need books to get in the best high schools and colleges. Those are

Some reason of why you should donate money or books to my school.

Barely 50% of students do not graduate high school for not having a high reading level. People with a high reading level most likely graduate high school and go to college. Students with no reading each day are more likely to fail or drop out of school. If we receive more books we are able to achieve a higher reading average.

I believe that we all have a responsibility to donate books or money to Young Scholars Charter School because Barely 50% of students don't graduate school for not having a high reading level, at my old school we had over 200 books in our library but here we don't even have over 55 books in our library, and ethically without books we won't get to learn words that we don't know. If we take action we will improve our reading level. If we don't take action we will start to run out of books to read and have to keep on reading the same old books.

Sincerely,

Drymeat

If you care about students at yscs you will help me? I believe that we all have responsibility to donate book or money to yscs (Drexel) because they don't have books to teach them more words.

I don't think you should trust me because I don't lie when it comes to stuff like my education. I am a very trustful person (student) and a good student at that. I get good grades but in reading I don't because we don't have that many books to read.

I feel uneducated, we don't learn a lot of big words or we don't get higher in reading level. We don't get smarter in reading as much as we are supposed to, we are smart at reading but not enough to score advanced. We also do not read a lot because we don't get a lot of vocabulary.

We have about 250 books in our classroom library. Not enough to learn a lot. Other schools has millions of books in there library. My friends are allowed to find thousands of books they love

because their classes library is bigger than a library closet.

Clearly I believe that you have responsibility to donate books or money to YCS (Drexel) because they don't have books to teach them new words. If you don't take place we will not learn as many words as possible and every thing is possible.

Sincerely

Amnah

A story about my class realizing that we have few books to read. I believe we have a responsibility to donate books to children to read so they can improve their reading levels. Also this will ~~also~~ help them enter the best high schools and colleges.

You should trust me because I am one of those many children in the world that do not have enough books to read in my classroom. You are an immense company that is capable of making my classmates and I reading levels mature. My reading teacher and myself spend hundreds of dollars on books a year. Please help reduce the cost of a quality education.

I walk pass my classroom bookshelf with books that have one of the genres I find interesting such as Science fiction and non-fiction. I have to spend my personal savings on genres that I enjoy. I feel that my classroom needs a diverse collection of fiction, Science Fiction Fantasy, mystery and war-fiction. Books such as The Hunger Games Trilogy, The Percy Jackson series, The Kane Chronicles, The Harry Potter series etc... this will excite readers and raise our reading levels. We have few books in my classroom

but if you can help us and give us either \$17,000 to buy books or give 400 books that would be extremely helpful.

There is a gigantic difference in which the 2% of children read. Private school students have tons of books in their classroom. We should be allowed the ~~same~~ same access. Otherwise 15% percent of students do not graduate school due to low reading levels. My classroom only has 55 books for 29 students, it's not fair. It is unfair that we have less books than private schools. You can help me take action and improve my classmates and I reading levels.

What will happen is you will make my classmates not smarter. Also my teacher wouldn't be able to afford 400 books. So please donate.

Sincerely,

Chaci
